

# JUMC Watering Instructions:

- 1.) Lock box for the key to the well pump switch is behind the white shed. Combo: (1-3-5-7-9)
- 2.) Unlock pump switch box and flip switch to on. The other key is for the shed door.
- 3.) Hose and faucet are behind the shed.
- 4.) The 2 crab trees the maple in the front need deep watering at least once a week if there is less than 1 inch of rain.
- 5.) Flowers and shrubs need deep watering once per week. Draw the water stream from the hose in a circle around each plant about 5 times per plant should be enough. If we get 1 inch of rain during the week, that would suffice and no additional watering needed. (Chris Gritzmacher).
- 4.) Water plantings by the front signs, around the foundation, and the window boxes, as well as the patio flower bed. Water the planters on the front stoop (they will dry out quickly in hot weather).
- 5.) Water the grass on either side of the new sidewalk.
- 6.) When done, flip the pump switch to off, lock the switch box, and return the key to the lock box entering the same combo (1-3-5-7-9) to lock the box.

Call John Swanson (920-450-4056) if you have any questions.
